50 Pcs.

A 3D model of a mechanical part, likely a bracket or support, rendered in a dark gray color. The part features a top horizontal flange with rounded ends, two vertical support legs, and two circular holes. A fillet is applied to the inner corner where the top flange meets the vertical support legs, smoothing the transition between the two surfaces.

A 3D perspective view of a rectangular plate. The plate is light gray and has two circular holes, one near each end. The holes are dark gray with visible internal threads, suggesting they are threaded. The plate is oriented diagonally from the top-left to the bottom-right.
